DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted Prior Art (APA) in view of Yu (U. S. 2004/0080989).

Regarding claim 1, APA discloses a USB mobile disk-pen 200 includes a lower pen shaft 201; an upper pen shaft 203, a lower pen housing, a refill 2011, a spring, a sheath, a USB 202, plug and a printed circuit board (PCB) 2021, wherein: the refill is simultaneously extended into a pen opening at a lower end of the lower pen housing when being penetrated through the spring; one end of the lower pen housing is provided with a screw pillar for coordinating with a screw opening at an inner periphery of the lower pen shaft; the refill is withdrawn, or extended in the lower pen shaft through compression of the spring on the refill using the lower pen shaft; and the lower pen housing is provided with an internal screw thread. APA discloses the claimed invention except for the USB mobile disk-pen are that, the sheath is joined with the USB plug, and has one end thereof connected with the PCB that is penetrated into the sheath and together positioned with the sheath in a shaft opening of the upper pen shaft, whereas the other end thereof disposed with an external screw thread for fastening with the

internal screw thread at the lower pen housing, thereby combining the upper and lower pen shafts into one body.

Page 3

Yu (see figures 5A and 5B) discloses the USB mobile disk-pen are that, the sheath is joined with the USB plug 23, and has one end thereof connected with the PCB that is penetrated into the sheath and together positioned with the sheath in a shaft opening of the upper pen shaft 10. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify APA to provide the USB mobile disk-pen are that, the sheath is joined with the USB plug, and has one end thereof connected with the PCB that is penetrated into the sheath and together positioned with the sheath in a shaft opening of the upper pen shaft as taught by Yu so as to better protect the USB connector.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong KT Dinh whose telephone number is 571-272-2090. The examiner can normally be reached on 8 -5, 5 days a week.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Field can be reached on 571-272-2092. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
